the water area created by water used under these filings. Other re-
creational uses and regulated trapping of fur bearing animals on a
sustained yield basis and livestock grazing will be permitted over the
entire area served by this water.

DESCRIPTION OF PROPOSED WORKS

Water is diverted through a canal 16' wide, 4' deep with slope of .0003

State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water to first of Indian Lakes, then through natural channels to point of return.

5. Estimated cost of works Previously built, no cost at present

6. Estimated time required to construct works finished under present plans.

The Truckee-Carson Irrigation District of Fallon, Nevada, guaranteed delivery of waste water to the Fish and Wildlife Service and the Nevada State Fish and Game Commission under terms of an agreement signed by all 3 parties on Nov. 26, 1948. These filings are made for the protection they offer to the State Fish and Game Commission and the Fish and Wildlife Service in the heavy investment being made in the Stillwater Wildlife Management Area and are not meant to interfere with primary use of the water by Truckee-Carson Irrigation District in the operation of the Newlands Project.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

(CONTINUED ON PAGE 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 30 cubic feet per second, but not to exceed 21,719.3 acre-feet yearly.

Actual construction work shall begin on or before

Proof of commencement of work shall be filed before

Work must be prosecuted with reasonable diligence and be completed on or before October 26, 1992

Proof of completion of work shall be filed before November 26, 1992

Application of water to beneficial use shall be made on or before

October 26, 1997

Proof of the application of water to beneficial use must be filed with State Engineer on or before November 26, 1997.

WITNESS MY HAND AND SEAL this 26th day

of October, 1987

Certificate 14847 issued 02-13-98

State Engineer.

(PERMIT TERMS CONTINUED)

This permit is issued subject to all existing rights on the source. It is understood that the 30 c.f.s., herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to a beneficial use. A suitable measuring device must be installed and accurate measurements of the water placed to a beneficial use must be included in the proof of such use when filed. The State retains the right to regulate the use of the water herein granted at any and all times.

This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued specifically subject to the agreement dated September 8, 1987 between the Truckee-Carson Irrigation District, Nevada Department of Wildlife and the United States Fish and Wildlife Service.

This permit is issued with the following terms and conditions:

1. The historic record of Carson River flows in the State Engineer's office provides substantial evidence that from time-to-time surplus flows reach the point of diversion described herein.
2. There are no other existing rights either under the Carson River Decree or of record in the State Engineer's office downstream from the point of diversion.
3. The Carson River Decree establishes and determines direct diversion rights for irrigation and other uses upstream from the point of diversion described herein and declares the Carson River and tributaries to be fully appropriated for these purposes.
4. Any water that reaches the point of diversion under this permit has been available for diversion by all decreed users set forth in the Carson River Decree, therefore, the approval of this permit does not conflict with the finding in the decree that the stream system is fully appropriated.
5. Approval of this permit is subject to all existing water rights on the source.
